

Restoring Your Hard Drive with Software Driver CDs

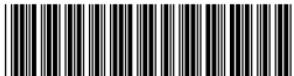

To start a full restore, open the Compaq Restore Solution package and follow the directions provided in the Compaq Restore Solution User's Guide. Note that you will be prompted to load any gray Restore Supplemental Software CDs you have during this process. When this process is complete, install the remaining software provided. Some of the remaining software supports the hardware specific to your PC (such as audio drivers and high-end graphic drivers) while some is third-party software (such as anti-virus software). First locate and install all of the gray and white CDs labeled *Software Drivers*. Once this is complete, locate and install all of the remaining third-party software as desired.
